Detail sheet

Requirements

To take the Architecture Specialization (ODC) exam, you must have obtained the Associate Developer (ODC) Certification.

Exam

- **Format:** Multiple choice
- **Number of questions:** 30
- **Passing score:** 70% (21/30)
- **Exam duration:** 90 minutes (if needed)

The exam focuses on practical knowledge and scenarios that validate your knowledge and professional experience. Each question has only one correct answer and incorrect answers do not affect your final score.

Exam topics

The Architecture Specialist (ODC) exam focuses on the fundamentals of OutSystems Developer Cloud Architecture, such as the elements that can be defined and reused in apps and libraries, how apps and libraries are deployed and can be configured in the several stages, the architecture design process, and the recommended architecture patterns. The following table has the topic breakdown and the respective weights.

Categories & Topics	Number of Questions	% of score
Cloud-native Architecture	8	24%
Apps and Libraries	2	7%
Deployments and Configurations	3	10%
Reusing Elements	2	7%
Architecture Design Process	9	30%
Non-functional Requirements	1	3%

Disclose	2	7%
Organize	2	7%
Assemble	3	10%
Naming Best Practices	1	3%
Architecture Patterns	11	37%
Libraries Reusability	3	10%
Integration	3	10%
Sharing Data	3	10%
Distributed Transactions	2	7%
Event-Driven Architecture	3	10%

Preparation

The best way to prepare for the Architecture Specialization (ODC) exam is to attend the [ODC Architecture Boot Camp](#) or follow the [Get Ready for the ODC Architecture Specialist Exam journey](#). We also encourage you to study the topics listed in the online resources section.

We also encourage you to study the topics listed in the **online resources** section.

Online resources

The [Architecture Fundamentals in ODC](#), [Architecture Patterns in ODC](#) and [Events](#) online journeys go through most of the topics covered in the exam. There are also several relevant articles in the OutSystems Documentation that we recommend you go through to prepare for the exam:

- [Cloud-native architecture of OutSystems Developer Cloud](#)
- [App Architecture in ODC](#)
 - [Building a well-architected app](#)
 - [Reuse elements across apps](#)
 - [Service Actions](#)
- [Libraries](#)

- Understand strong and weak dependencies
- Convert O11 architecture blueprint to ODC architecture blueprint
- About event-driven architecture
 - Event-driven architecture in ODC
 - Implement events in ODC
 - Properties of ODC events

We also recommend watching the [ODC Architecture Design and Patterns](#) talk recorded during the ONE Conference 2023.

Registration

Registration for the exam is available on the [OutSystems Certification Page](#).

Find the exam on the page, select if you want to take the exam Online or in a Certification Test Center and the language of the exam, then click on the Pre-register button. Then, fill out the Form with your data and follow the steps to register for the exam.

Rescheduling the exam

It is possible to reschedule the exam up to **48 hours before** the exam's scheduled date. Just access the [OutSystems Certification Page](#) and select the Reschedule option you will find next to the exam in question. **Less than 48 hours** before the exam, it is no longer possible to reschedule it, so you have to take the exam, or you will lose your exam attempt.

You can reschedule the exam free of charge up to **15 days before** the originally scheduled date. When rescheduling the exam 14 days before the original date and until the 48-hour period mentioned above, there will be an extra fee of 25 US\$.

Taking the exam

The exam is available in **Test Centers**. When registering for the exam, you can check for the test center closest to you and find an available date. This is the most complete experience since you will be in an environment fully prepared to host the exam and with support from the staff in the **local language**.

The exam is also available **online**, which means you can take the exam at your convenience and without traveling. The exams are proctored by a third party, which ensures the integrity of your physical and virtual environments and monitors the exam

to guarantee the fair and honest completion of the exam. You can find all about the online exams in [Prometric's user guide](#).

Note that for **online exams, the proctor support is only available in English**. If you select a language different from English for your exam, that refers exclusively to the exam content. Therefore it is still relevant that you have a certain level of proficiency in the language so you can communicate with the proctor during the exam setup or in need of assistance.

Repeating the exam

If you fail your exam attempt, you can always register again for a new exam, paying the regular exam fee. To register for the new attempt, register through our [Certification Page](#). In case you find any issues, please contact our [Support Center](#).

Specialization version

Your specialization is associated with a specific version of OutSystems. If you want to be certified on the latest version, you must pass the exam for that version. In this case, if you pass this exam you will receive the Architecture Specialization for OutSystems Developer Cloud.

Please take a moment to read the [Terms and Conditions](#), which you must accept to register and take one of our exams.

Good luck on your exam
