

Deployments in ODC

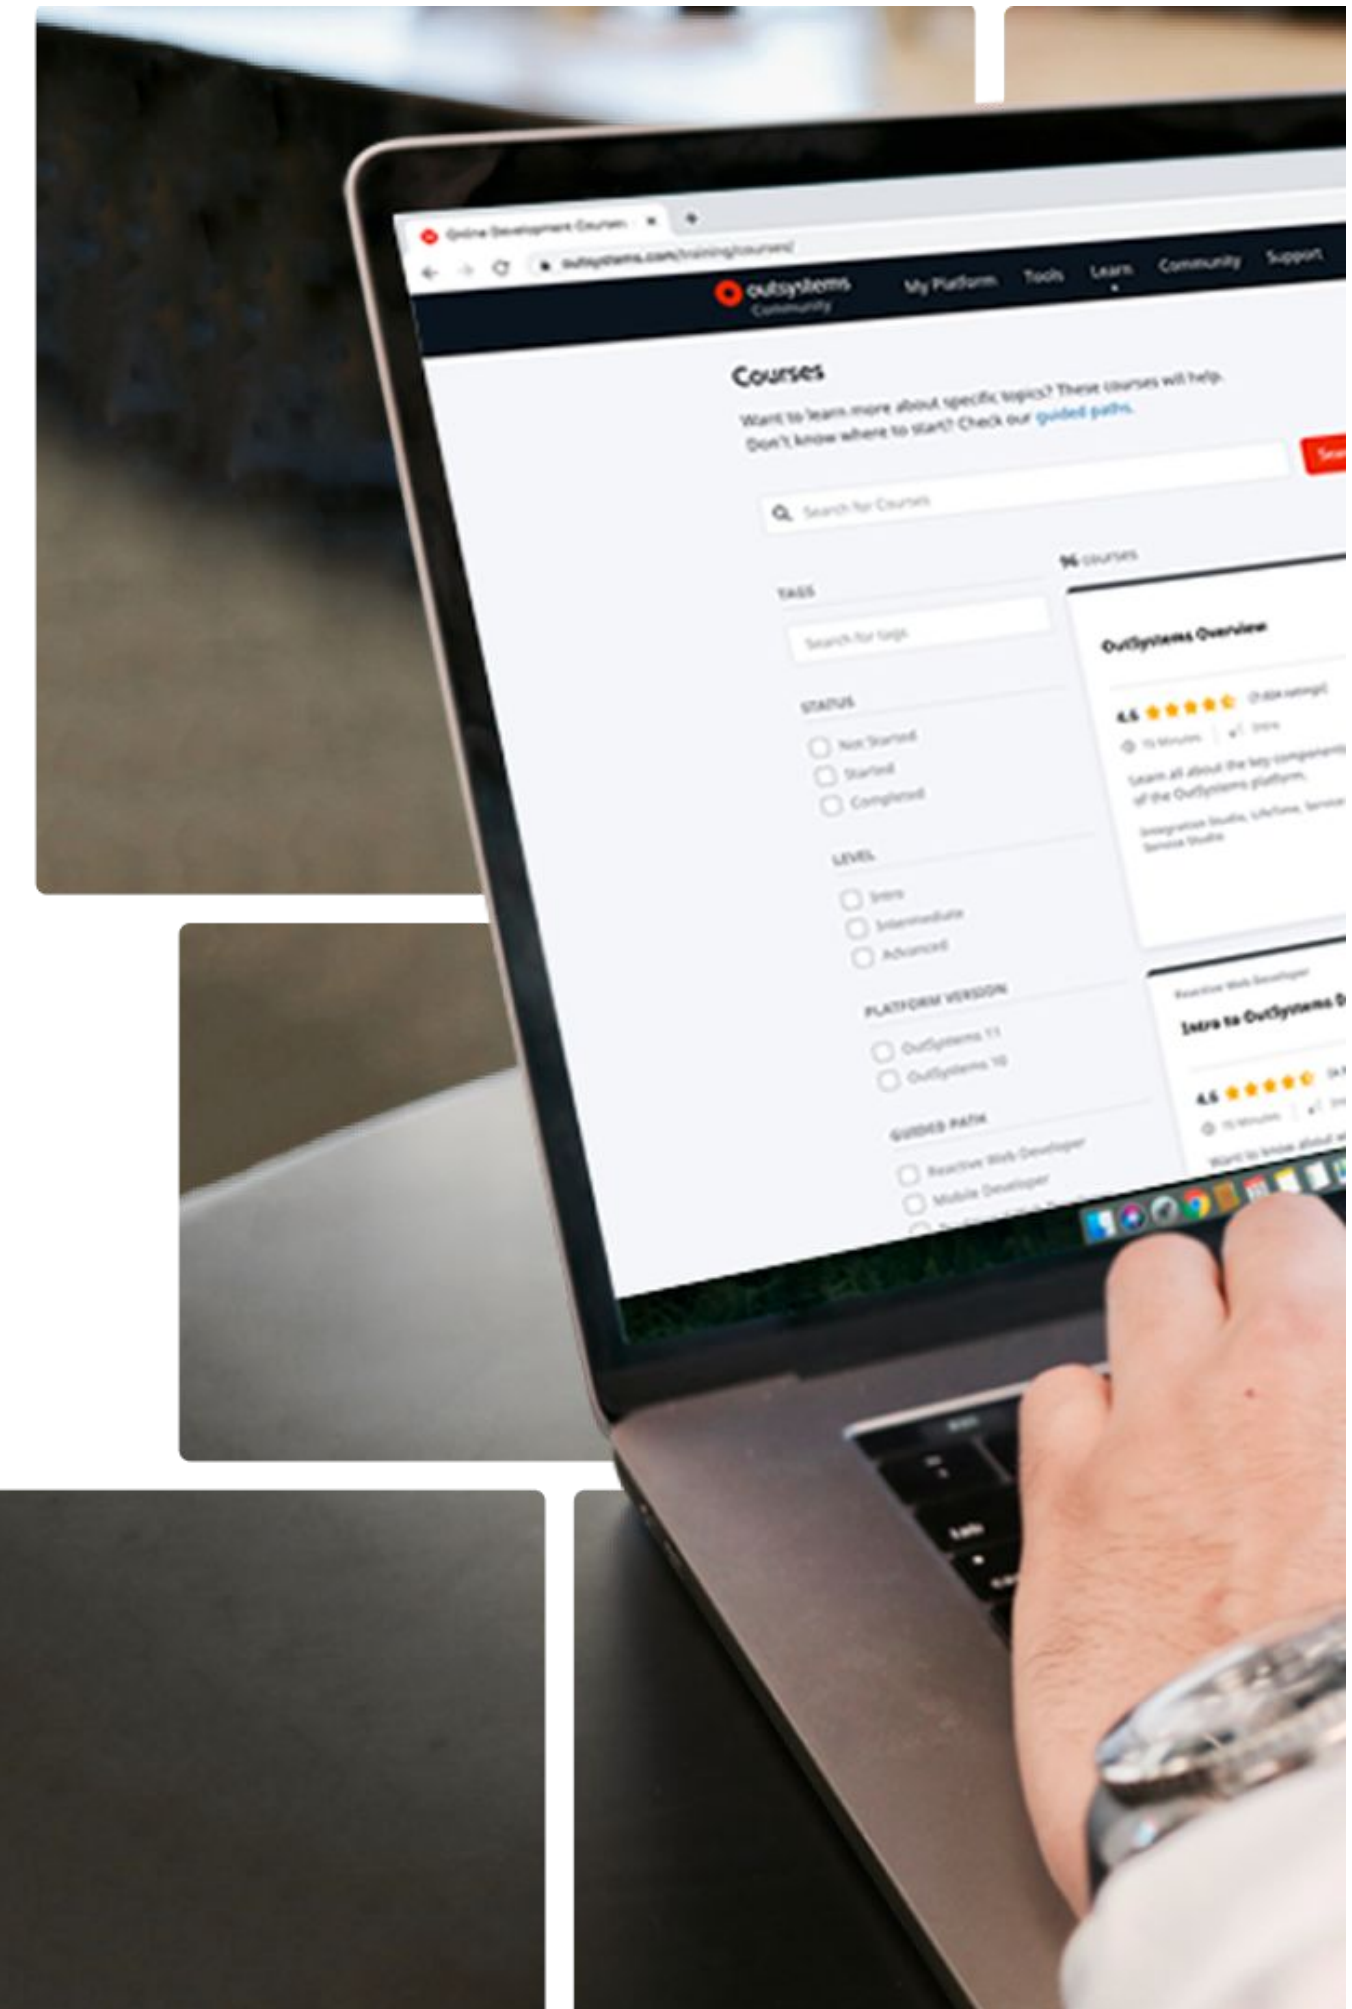

ODC Portal

ODC Apps

Publishing Apps and Libraries

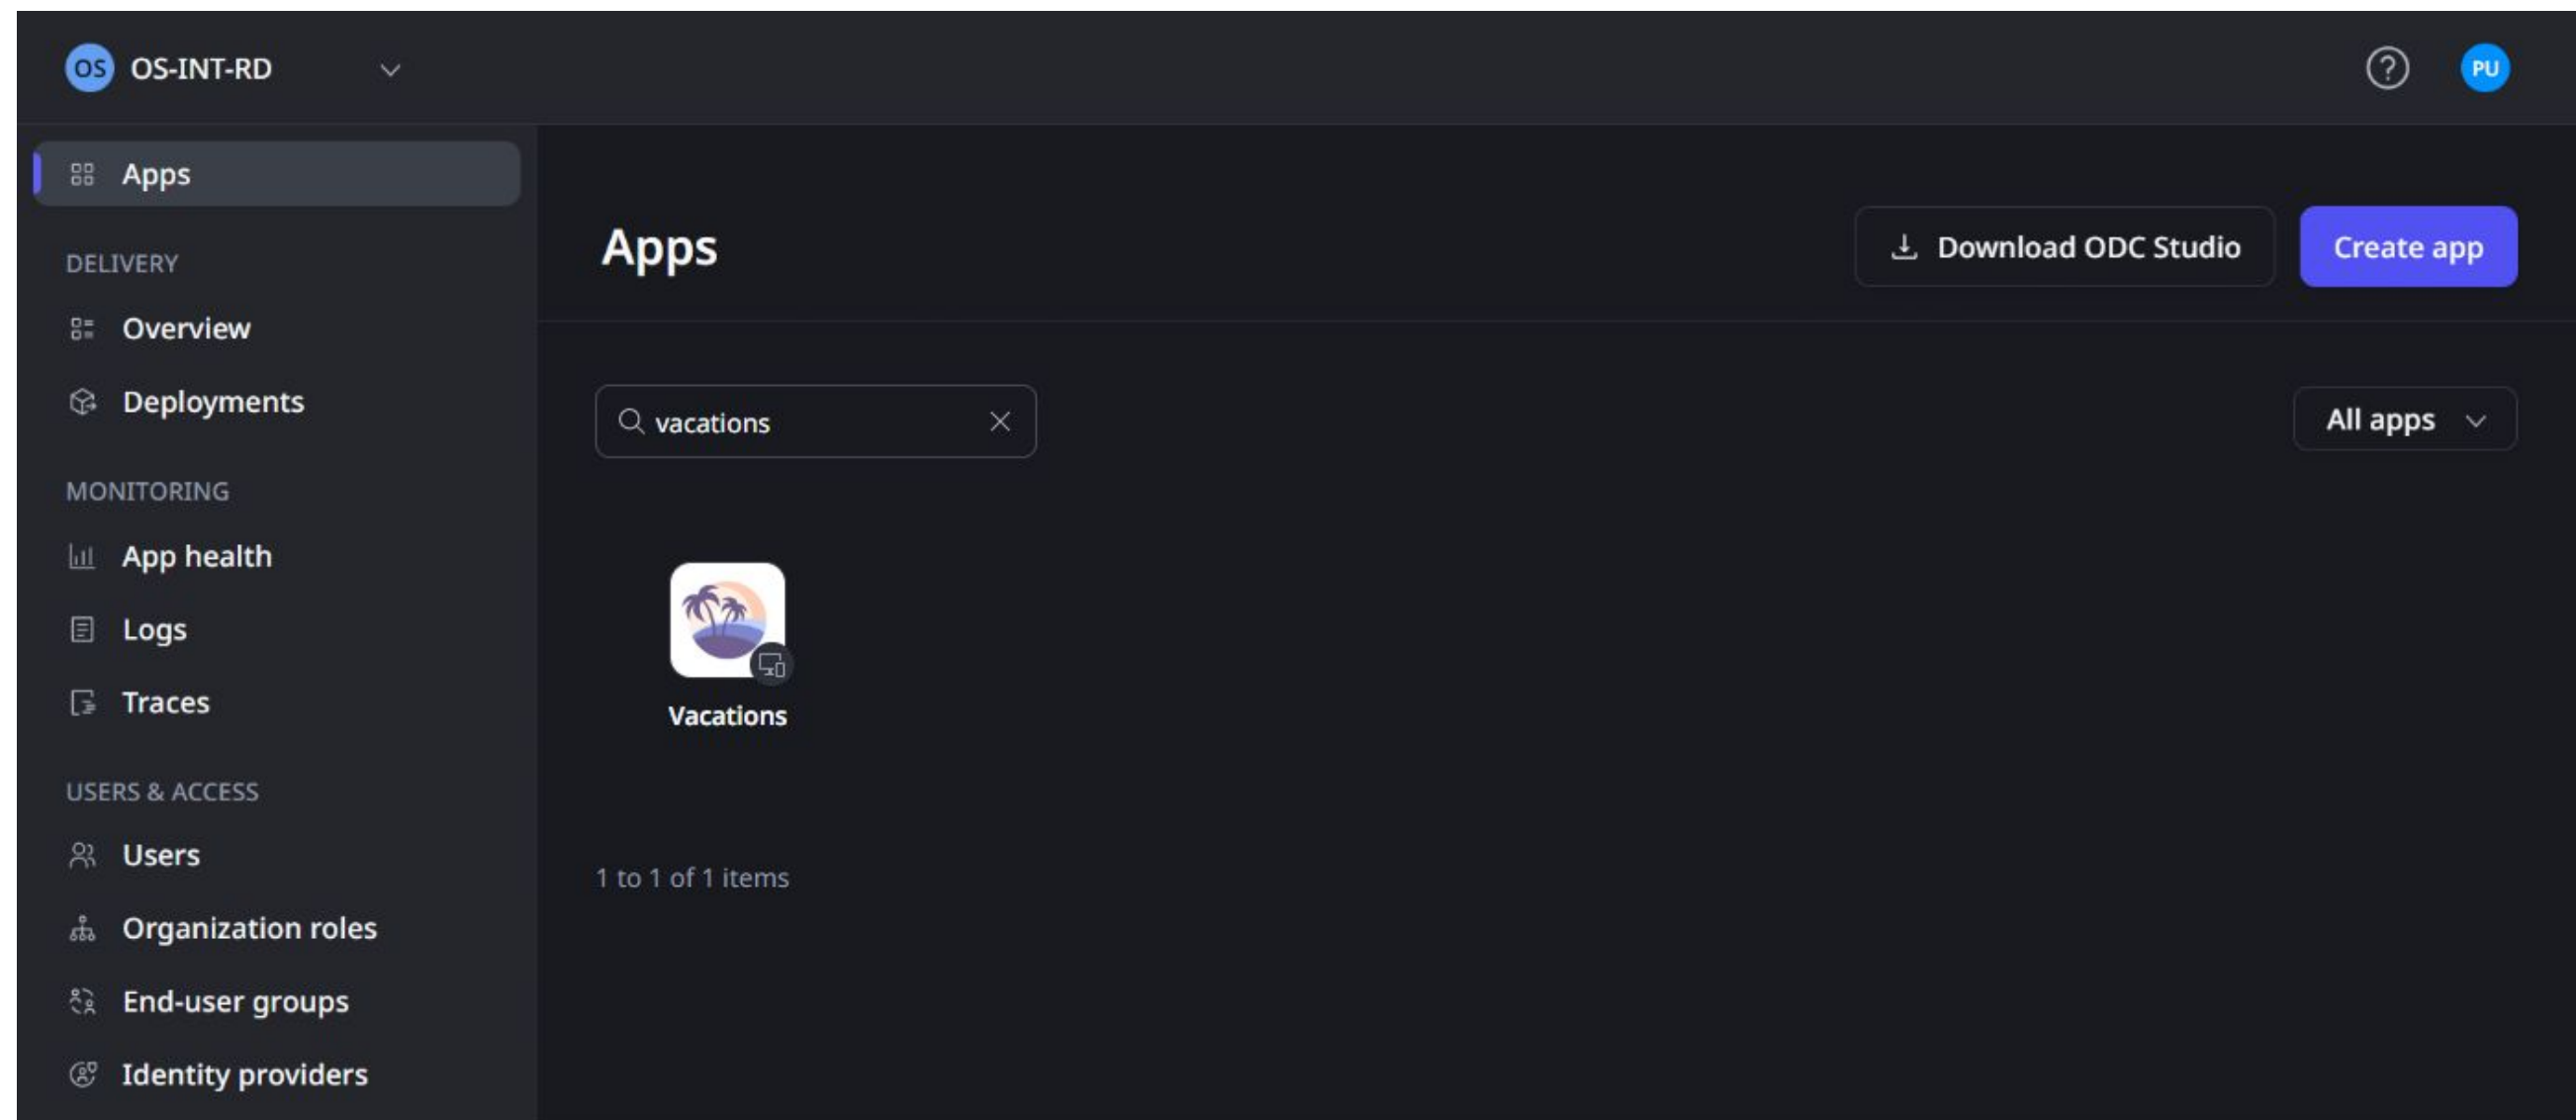

CI/CD

Terminology

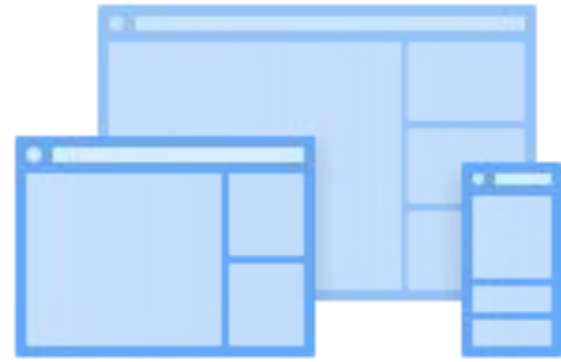

ODC Portal

Unified console to manage apps, execute deployments, monitor apps and manage users and permissions

OutSystems Developer Cloud Apps

App

Software that can run on all browsers or mobile devices

Library

Set of UI and logic elements that can be reused

Publishing Apps

Publishing an App

Apps are packaged into loosely coupled containers

Publishing Two Apps

Apps are packaged into loosely coupled containers

Only **weak references** are allowed between apps

Publishing Libraries

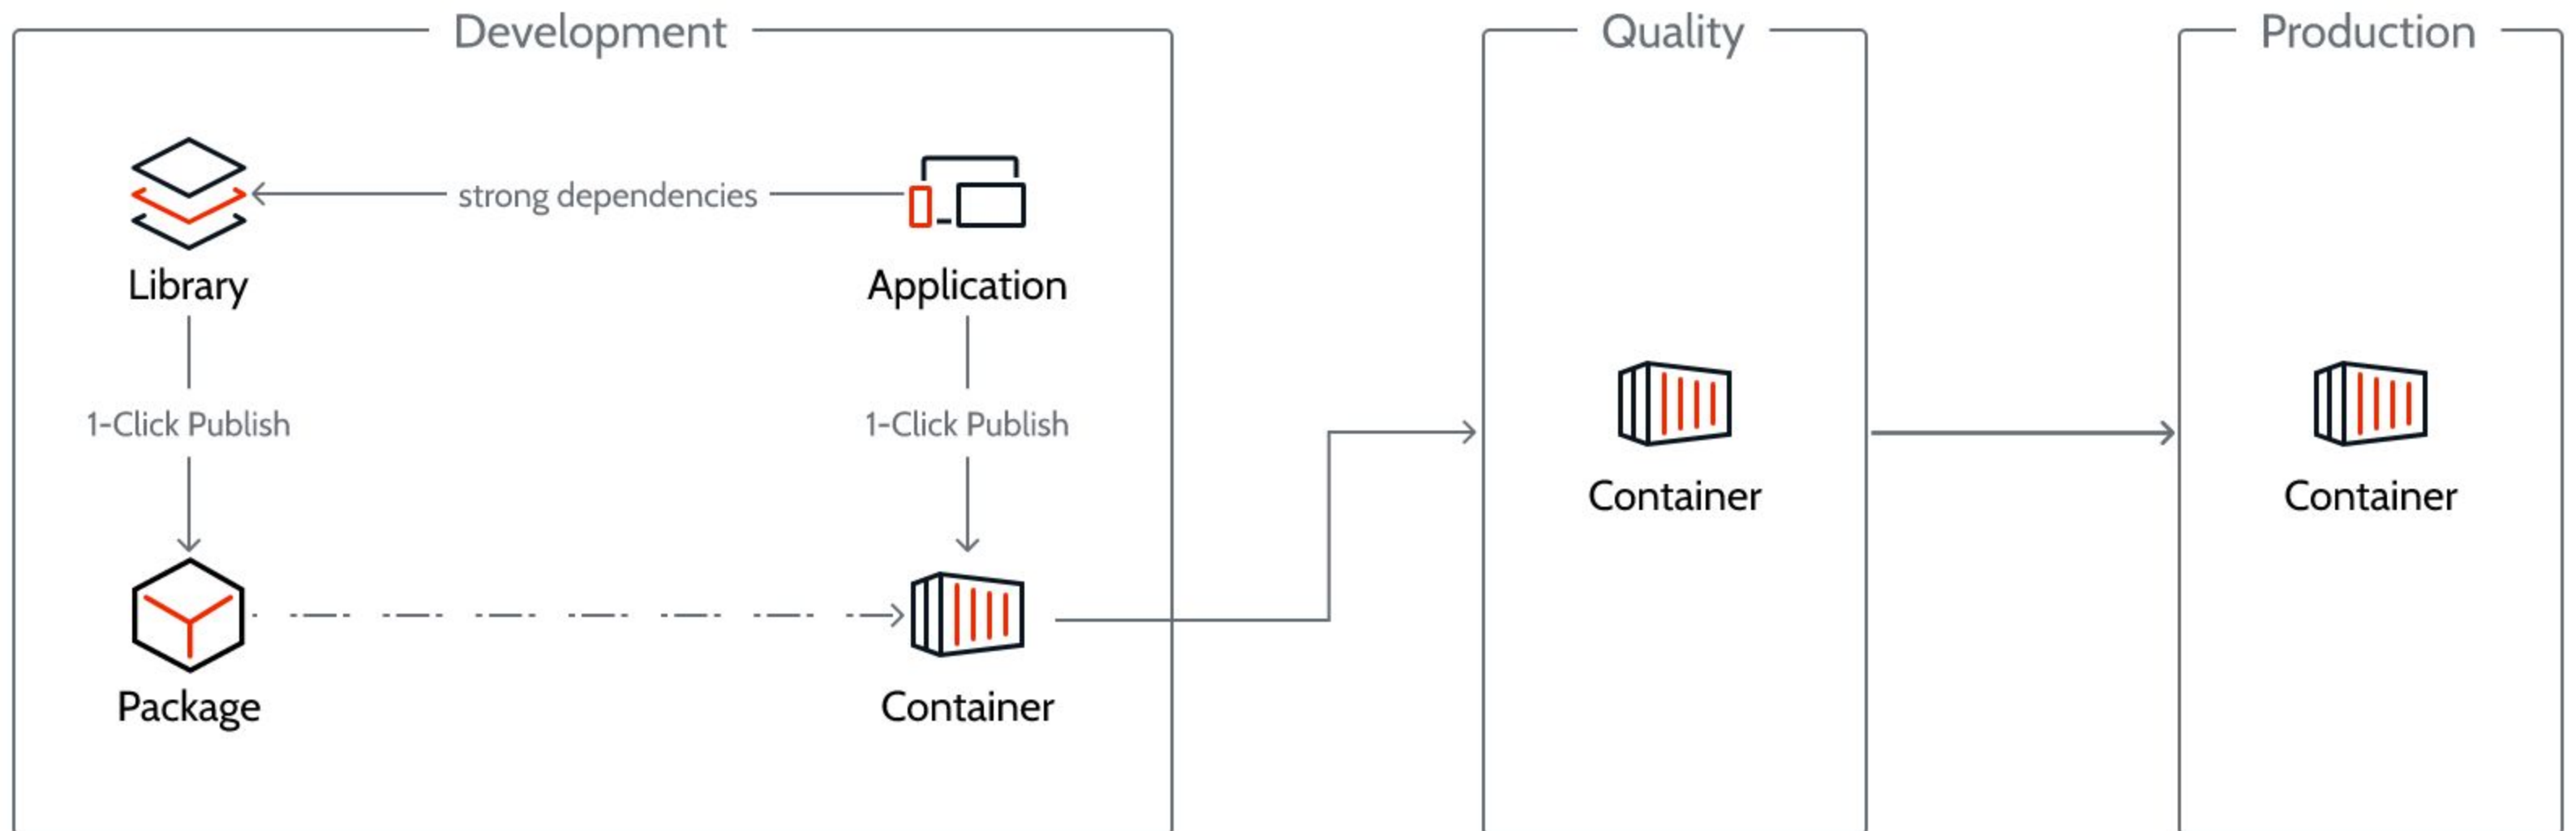

Libraries are packaged with each consumer app

Consuming elements from Libraries create **strong references**

CI/CD

Build once in Development and deploy to following stages
