

Architecture Patterns

Libraries Reusability Patterns

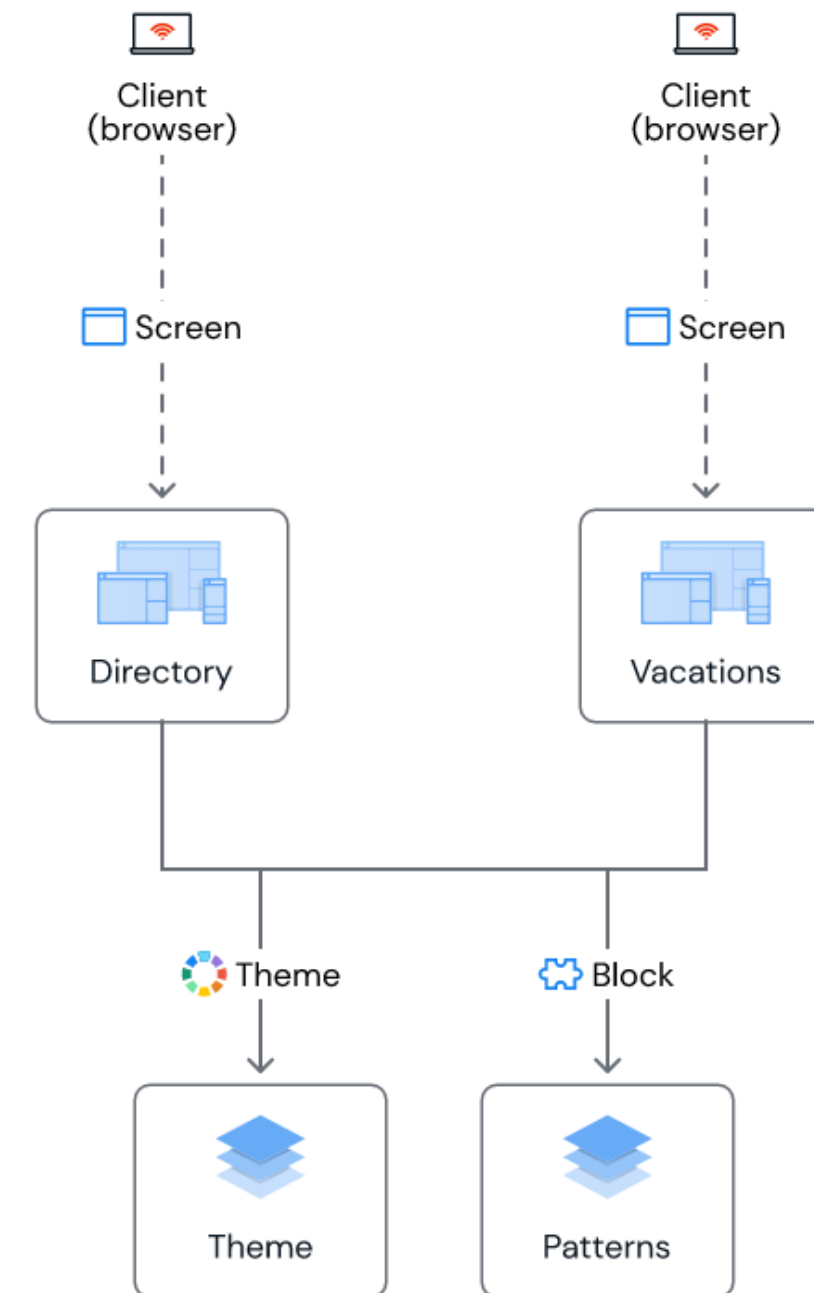

Libraries Reusability Patterns

Libraries have a set of UI and logic elements that can be **shared** and **reused** in multiple apps.

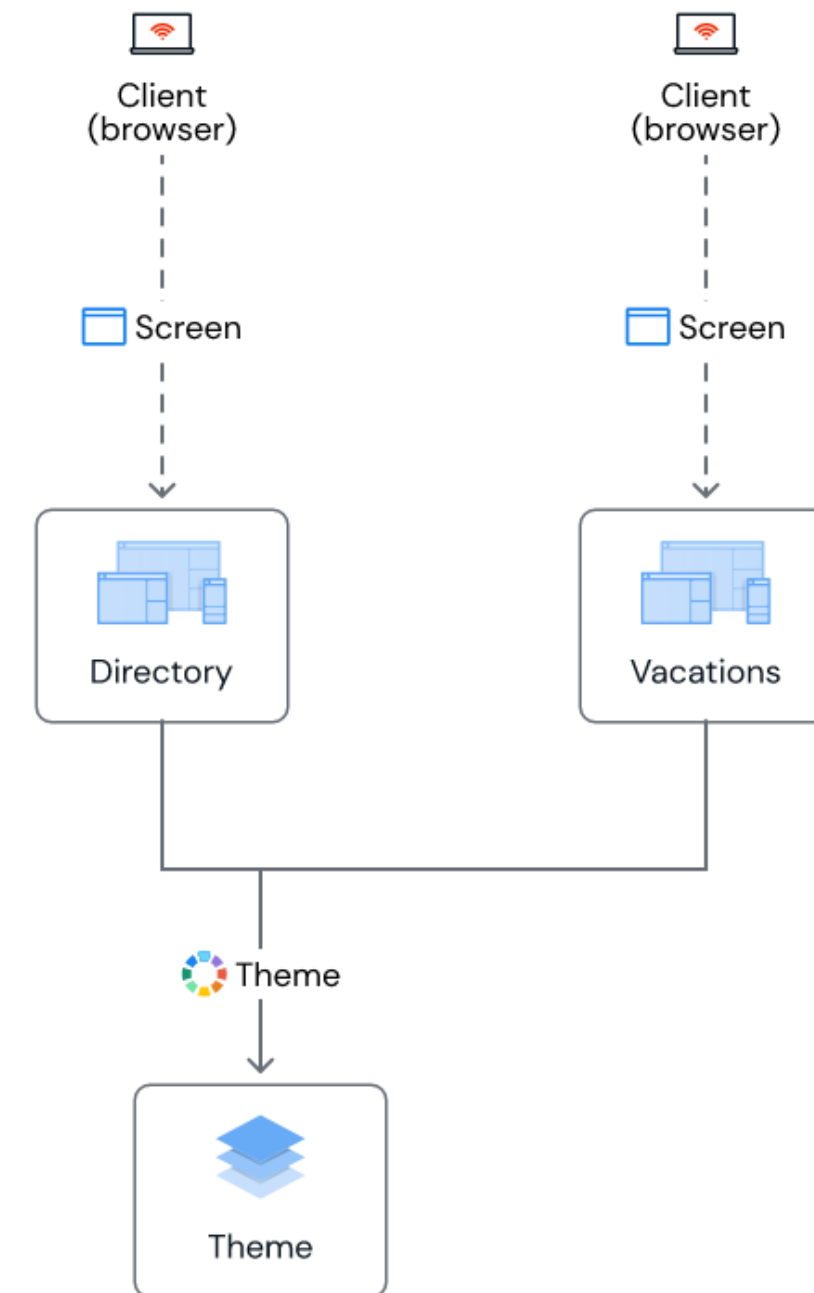

Using Libraries to Share Look & Feel

- Libraries with common UI and logic elements

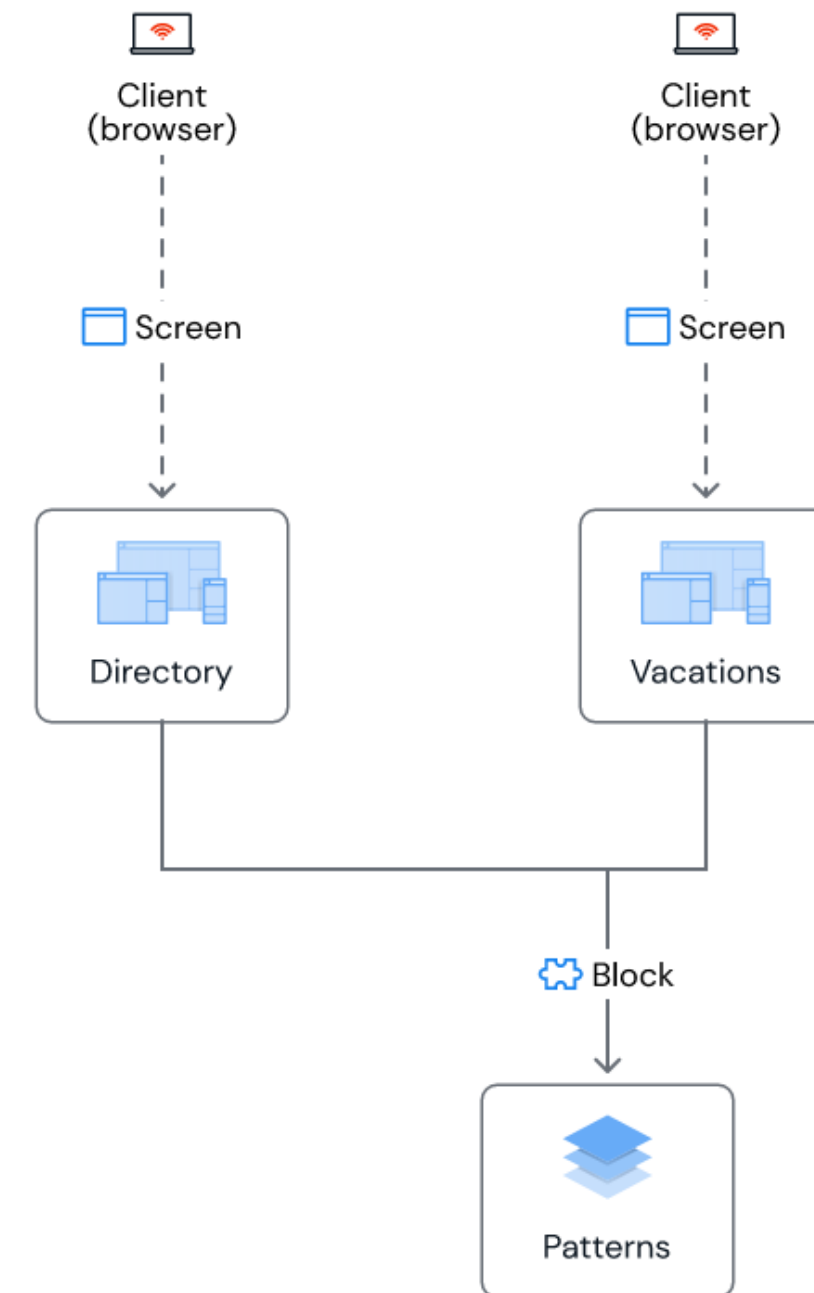

Using Libraries to Share Look & Feel

- Libraries with common UI and logic elements
 - Theme

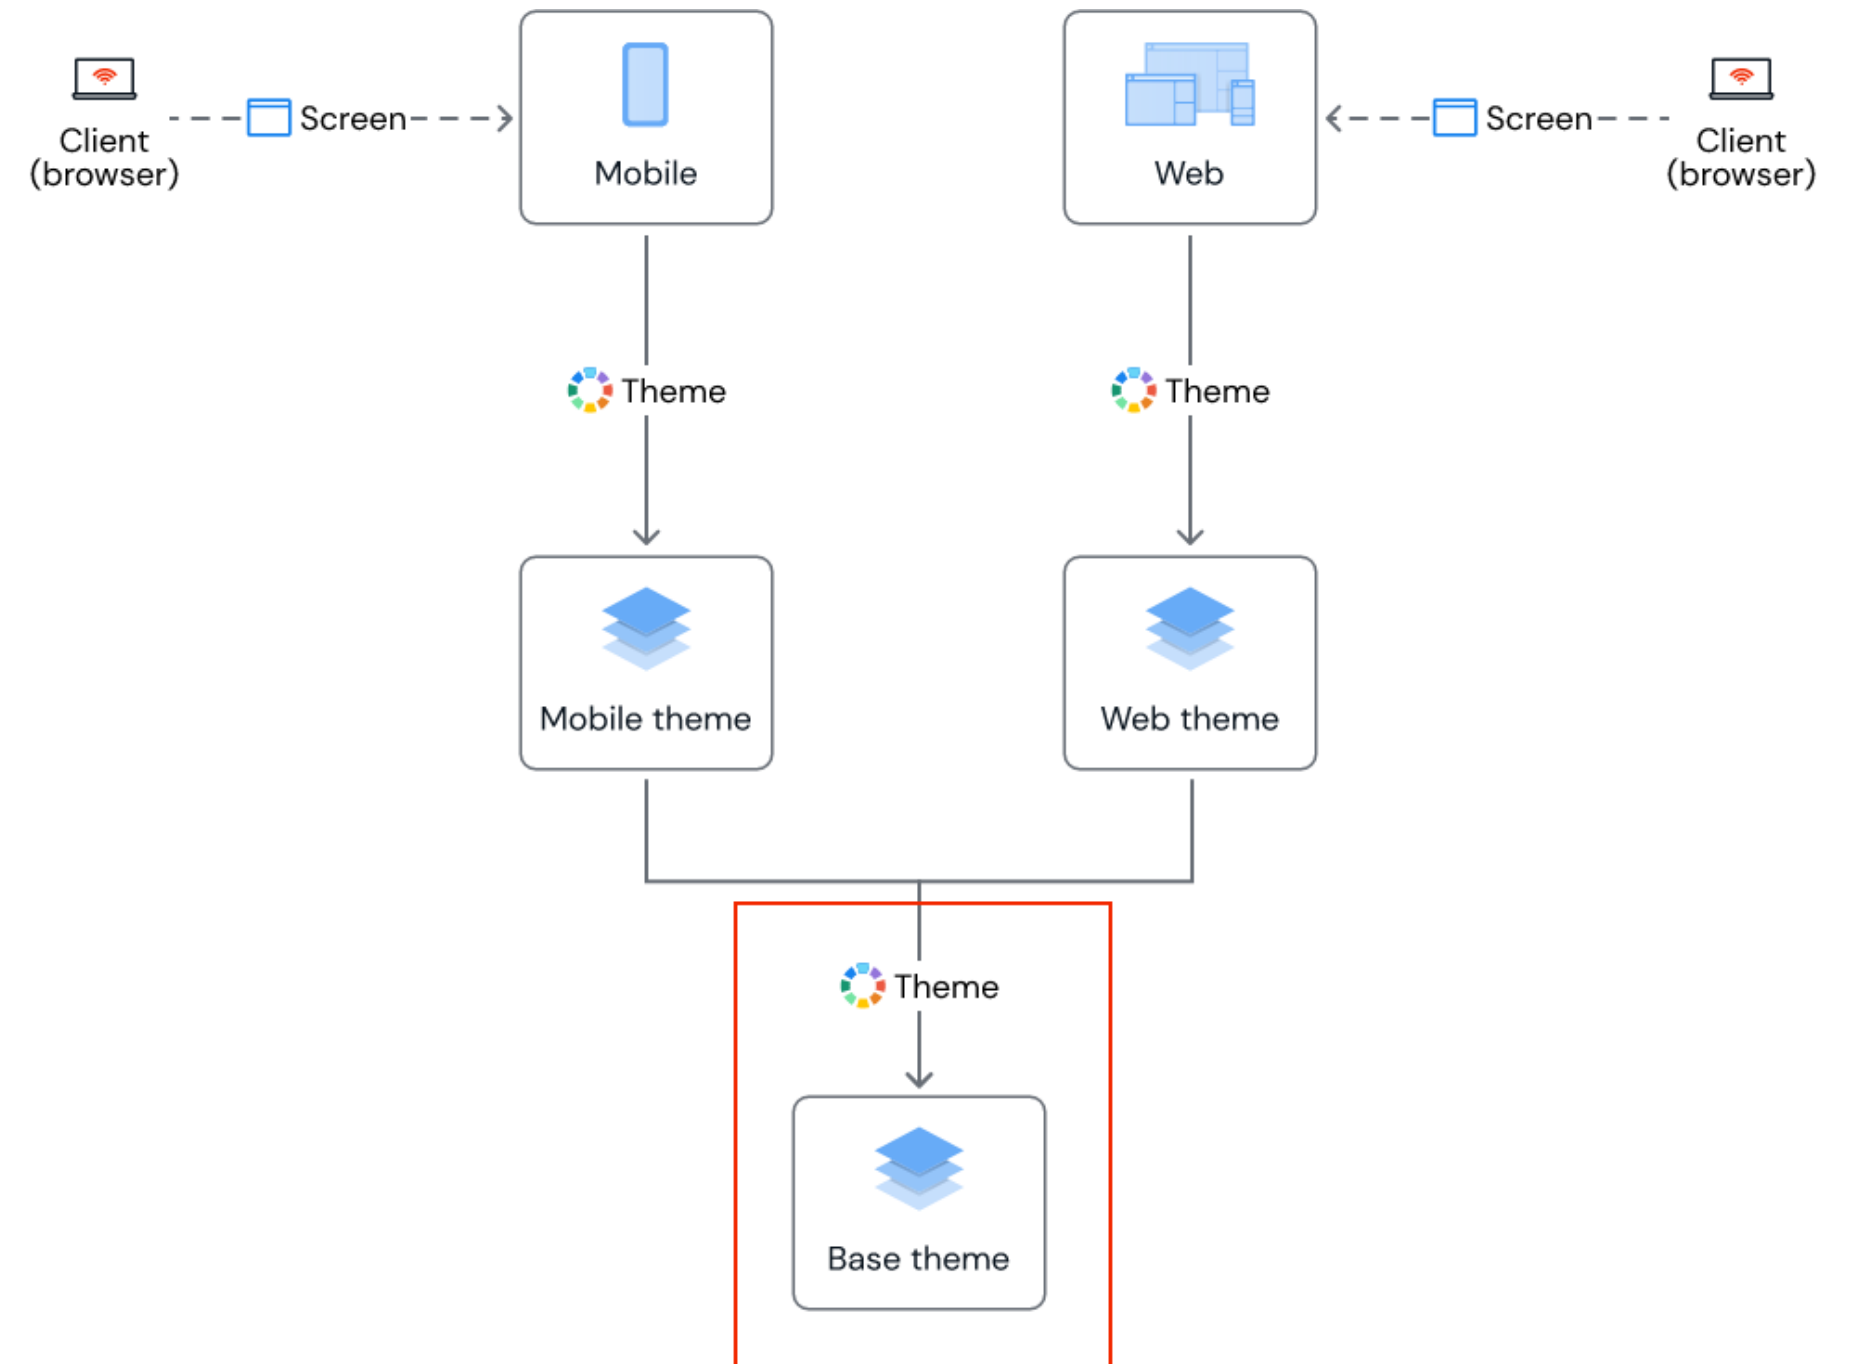

Using Libraries to Share Look & Feel

- Libraries with common UI and logic elements
 - Theme
 - Business agnostic patterns

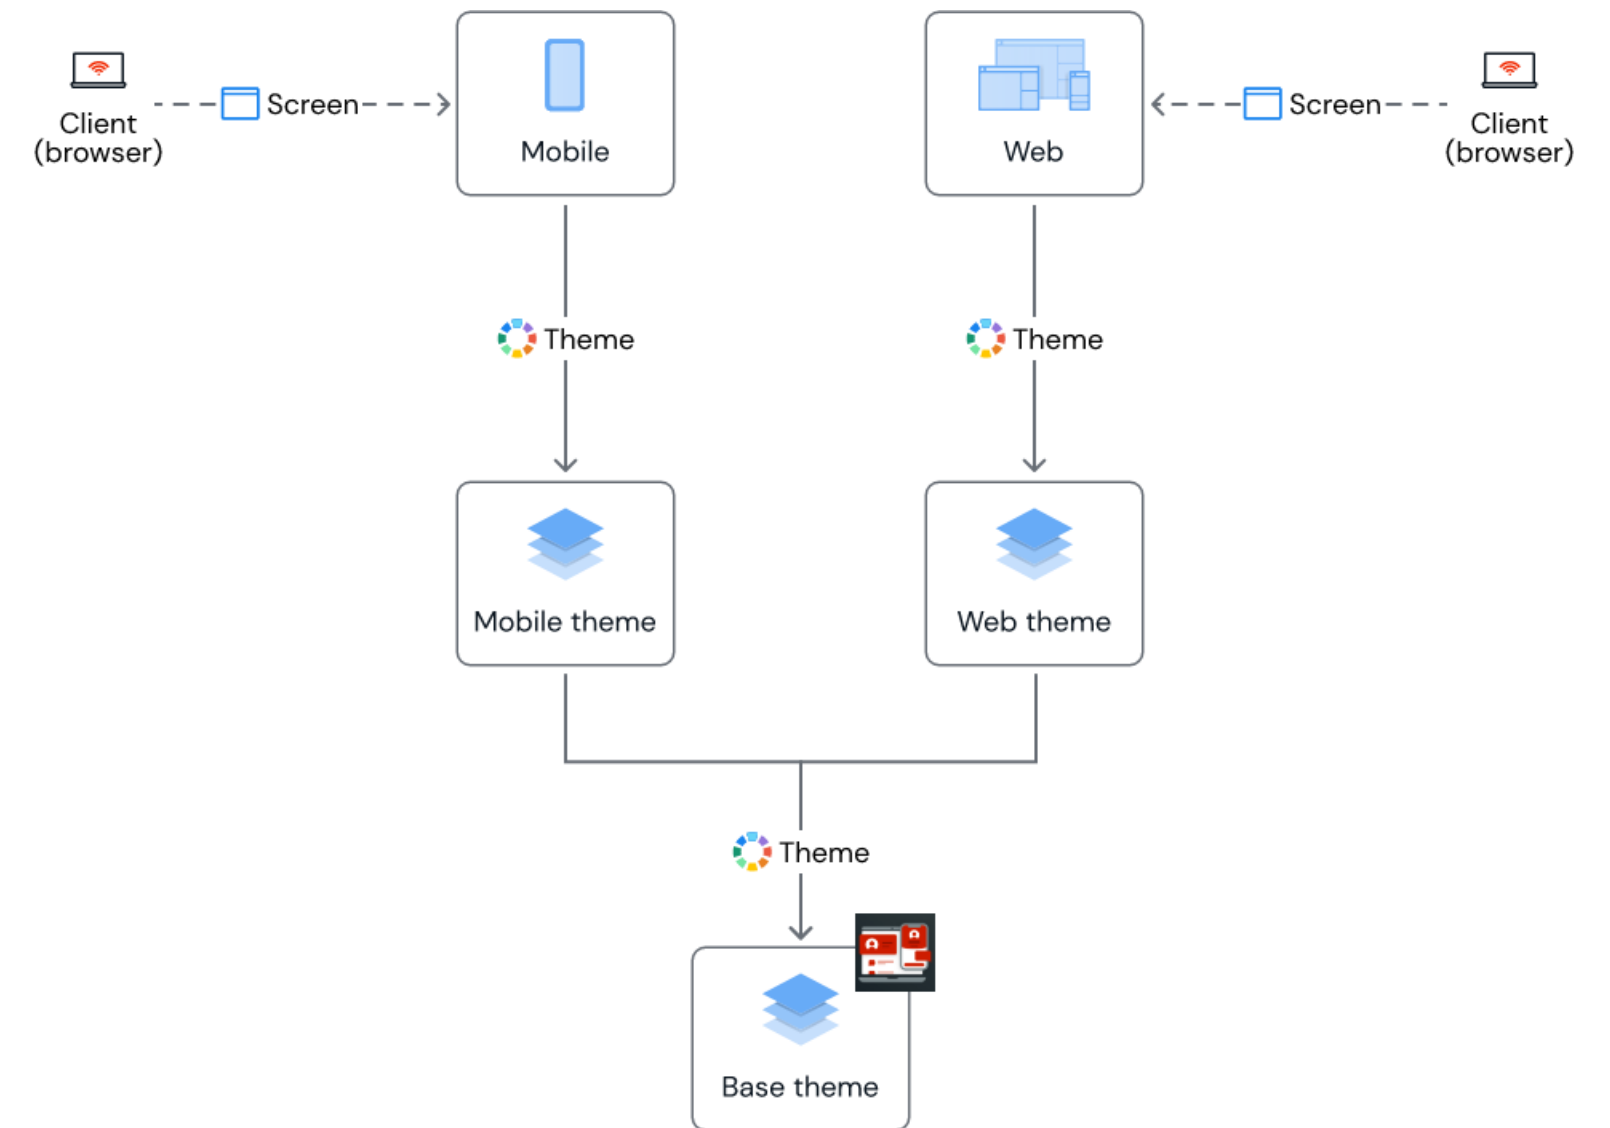

Using Theme Inheritance

- Start with a Base Theme
 - Common CSS

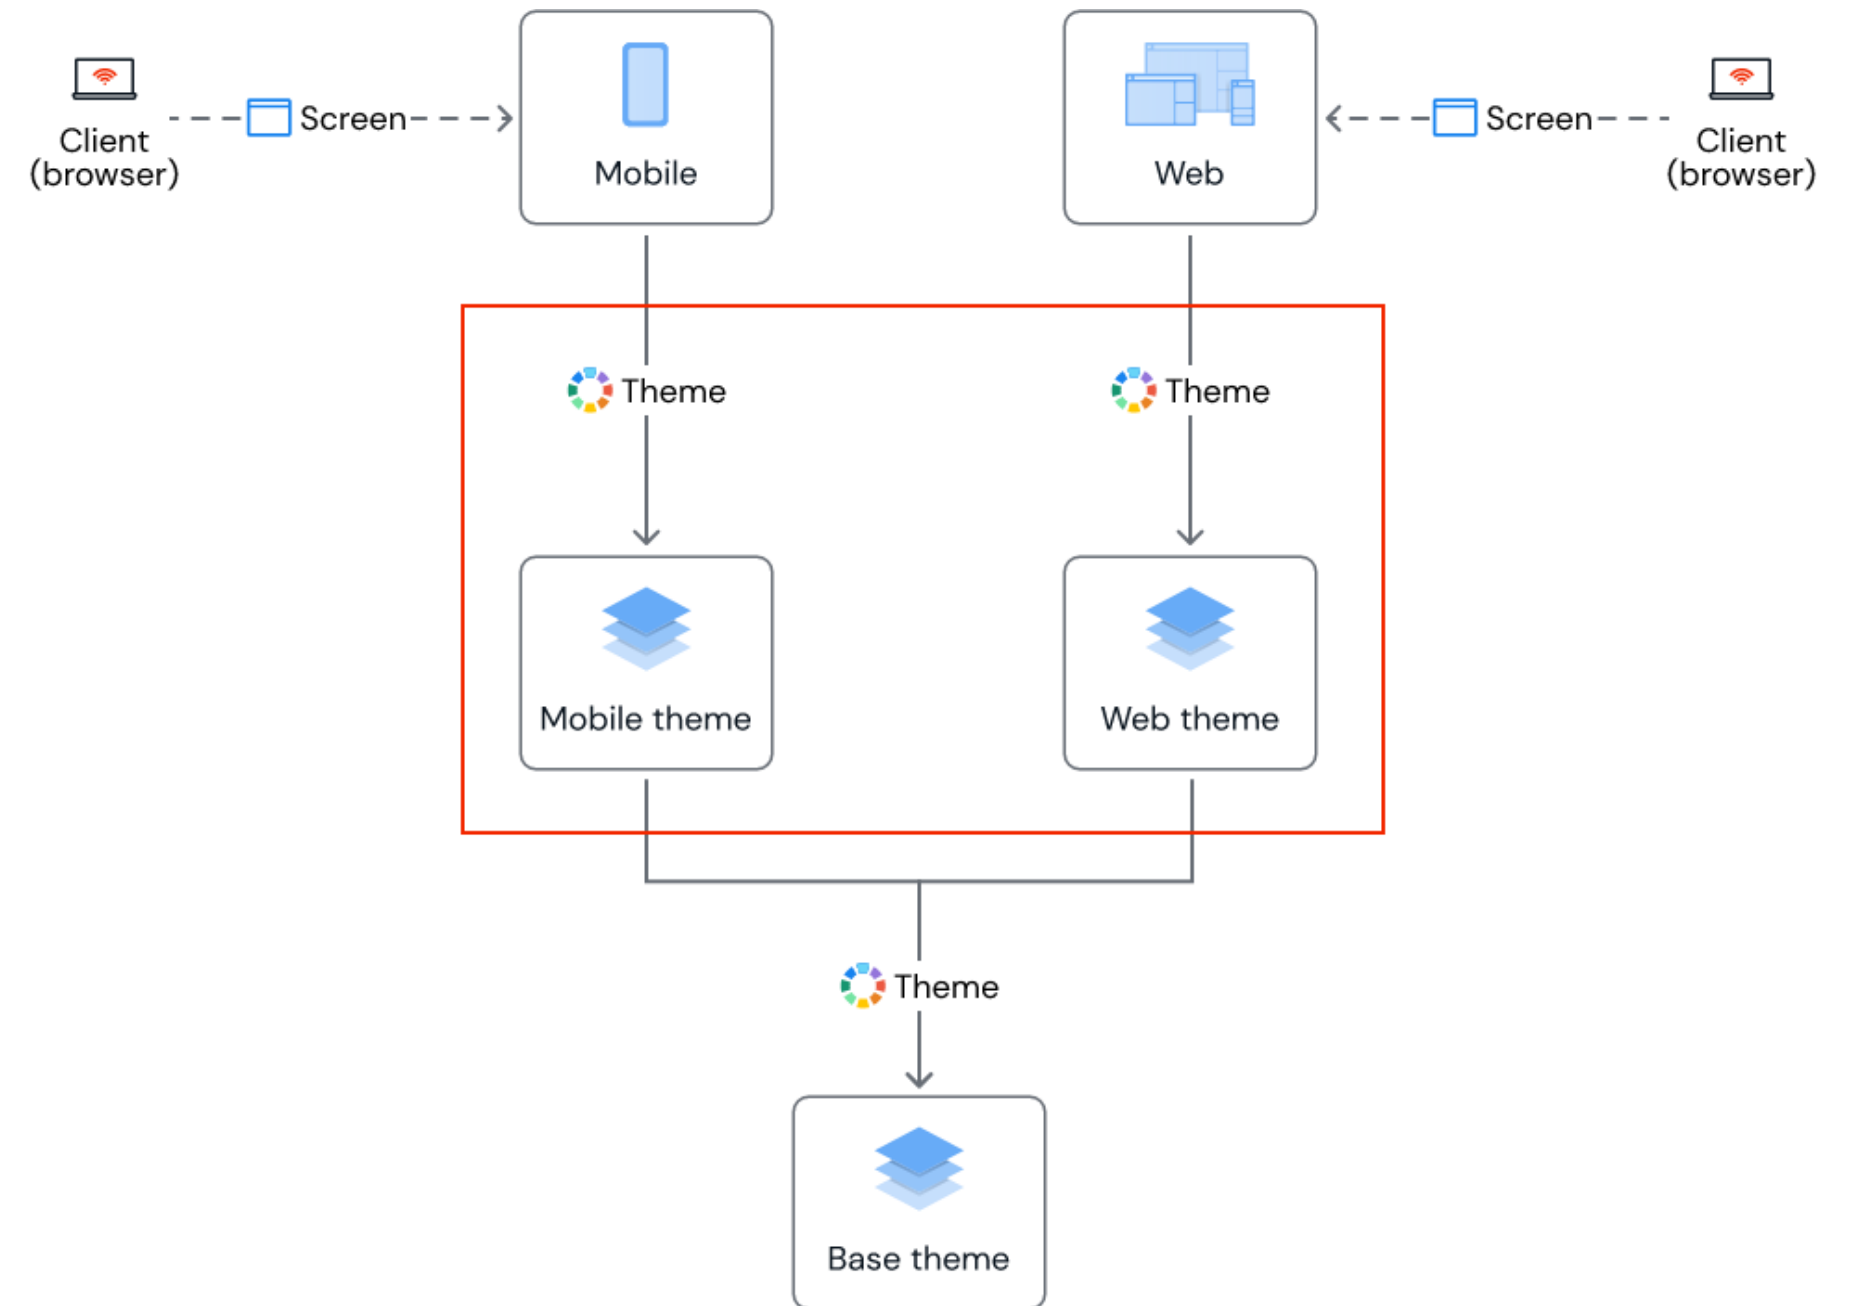

Using Theme Inheritance

- Start with a Base Theme
 - Common CSS
 - OutSystems UI is frequently used

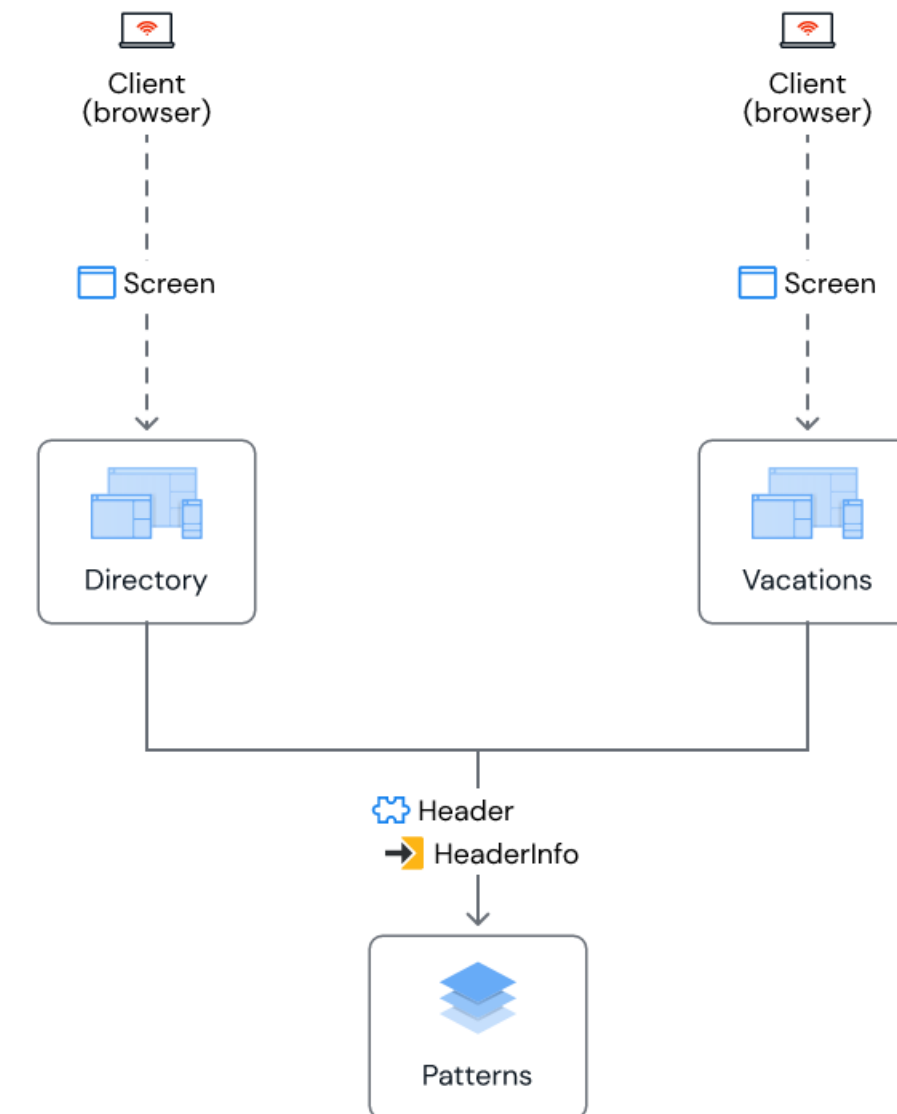

Using Theme Inheritance

- Start with a Base Theme
 - Common CSS
 - OutSystems UI is frequently used
- App's Themes
 - Inherit from Base Theme
 - Override Base Theme CSS

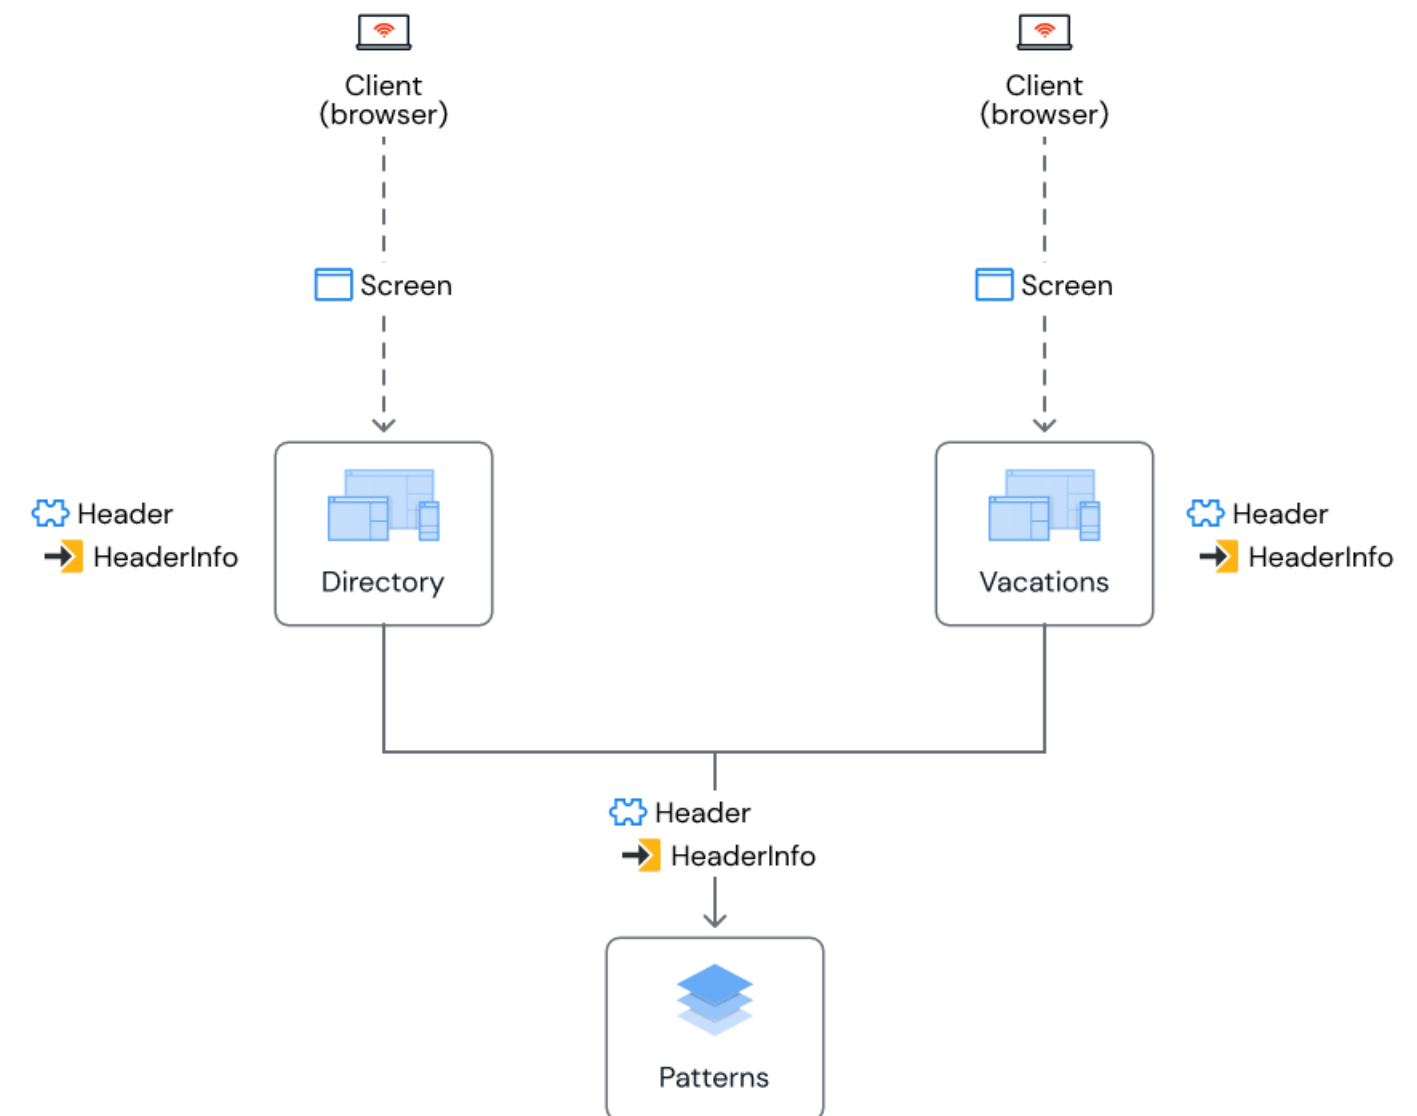

Sharing Blocks Across Apps

- Blocks should be business agnostic
 - Business data passed via Input Parameters

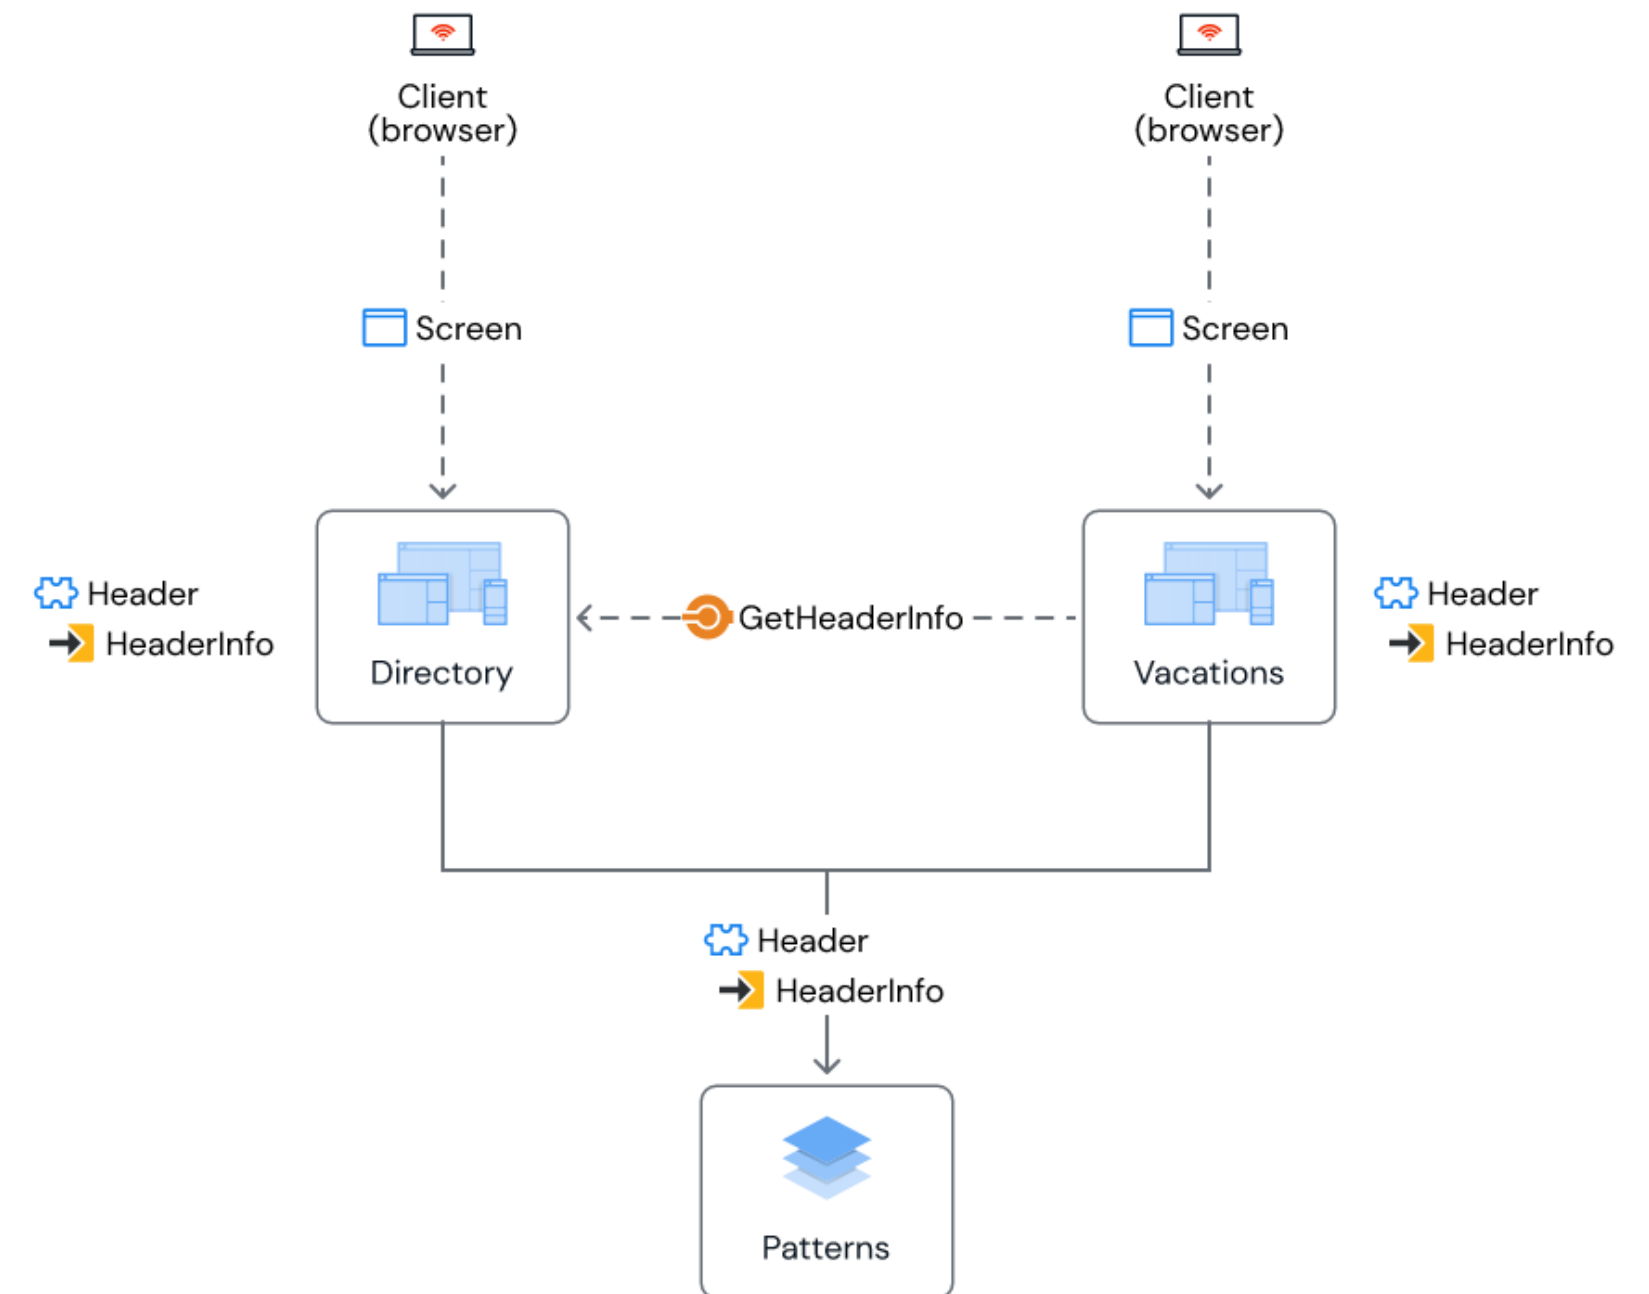

Sharing Blocks Across Apps

- Blocks should be business agnostic
 - Business data passed via Input Parameters
- Directory
 - Has the Header information

Sharing Blocks Across Apps

- Blocks should be business agnostic
 - Business data passed via Input Parameters
- Directory
 - Has the Header information
 - Service Action to share the info with other apps
- Vacations
 - Uses Service Action to retrieve info

Sharing an App Switcher Menu
